SKILLS

- C Programming
- HTML5
- CSS3
- Bootstrap
- JavaScript (ES6)
- React JS
- React Redux
- React Query
- Next JS
- Typescript (Basic)

CERTIFICATIONS

React Developer

Webskitters Academy

2024

Completed frontend development at Webskitters Academy (2023-2024), proficient in Next JS, React Query, React Redux, React JS, HTML5, CSS3, and JavaScript(ES6), with hands-on experience in creating dynamic web applications.

Web Development

2024

Encryptix

Completed a four-week virtual web development internship at [Encryptix](#), enhancing technical skills and contributing to real-world projects.

&

Pinnacle Labs

Completed a four-week virtual web development internship at [Pinnacle Labs](#), enhancing technical skills and contributing to real-world projects.

EDUCATION

B Com.

Sikkim Professional University

2023

Acquired comprehensive knowledge in commerce, accounting, and finance, with practical experience in financial analysis and business management principles.

Higher Secondary (12th)

BIDHAN SCHOOL

2017

Focused on advanced accounting principles, business studies, and economics, developing strong analytical and problem-solving skills essential for financial management.

Metric (10th)

BIDHAN SCHOOL

2015

Secured 10th place in accounts at Bidhan School in 2015, demonstrating strong academic achievement and proficiency in accounting principles.

PROFILE

Dedicated frontend developer with a B Com. degree from Sikkim Professional University (2020-2023) and extensive training at Webskitters Academy (2022-2024). Proficient in modern web technologies including React Query, React JS, React Redux, Next JS, and JavaScript (ES6). Demonstrated expertise in HTML5, CSS3/Bootstrap, and C programming. Possesses strong analytical and problem-solving skills with practical experience in financial analysis and business management. Proven ability to create dynamic and responsive web applications, showcasing a commitment to delivering high-quality digital solutions.

PROJECTS All My Projects: <https://github.com/RKS1999?tab=repositories>

WTS Academy Visit Site: <https://wts-academy.netlify.app/>

In this project, I developed a robust and responsive web application using React, integrated with TanStack Query for efficient server-state management and data fetching. This project demonstrates the use of modern web development technologies and best practices to create a seamless user experience.

- Built a responsive web app using React and TanStack Query for optimized data fetching and caching.
- Integrated Redux Toolkit for global state management and Redux Persist for state persistence.
- Utilized React Hook Form for efficient form handling and validation.
- Implemented client-side routing with React Router DOM for seamless navigation.
- Enhanced user experience with Bootstrap for responsive design and React Toastify for notifications.
- Managed asynchronous operations using Redux Thunk, ensuring smooth application performance.

E-com-You-Shop Visit Site: <https://you-shop-ecom.netlify.app/>

In this project, I developed a robust and responsive e-commerce web application using React, integrated with TanStack Query for efficient server-state management and data fetching. This project demonstrates the use of modern web development technologies and best practices to create a seamless user experience.

- Built a responsive web app using React and TanStack Query for optimized data fetching and caching.
- Integrated Redux Toolkit for global state management and Redux Persist for state persistence.
- Utilized React Hook Form for efficient form handling and validation.
- Implemented client-side routing with React Router DOM for seamless navigation.
- Enhanced user experience with Bootstrap for responsive design and React Toastify for notifications.
- Managed asynchronous operations using Redux Thunk, ensuring smooth application performance.

Crypto Coin Visit Site: <https://get-crypto-coins.netlify.app/>

In this project, I developed a comprehensive and interactive cryptocurrency dashboard using React, integrated with TanStack Query for efficient server-state management and data fetching. This project showcases the use of modern web development technologies and best practices to provide a seamless user experience.

- Built a dynamic cryptocurrency dashboard using React and TanStack Query for optimized data fetching and caching.
- Integrated Redux Toolkit for global state management and Redux Persist for state persistence.
- Utilized React Hook Form for efficient form handling and validation.
- Implemented data visualization using ApexCharts to display historical cryptocurrency data effectively.
- Developed user authentication with secure login, signup, and profile management functionalities.
- Enhanced user experience with Bootstrap for responsive design and React Toastify for notifications.
